- Opportunities for increased programming, rentals and overall usage of the facility

Cost: \$13 million

History: The Moonlight Amphitheatre is located in Vista's Brengle Terrace Park and was constructed in 1975 by the Vista Foundation (now the Moonlight Cultural Foundation) as a bicentennial project. Summer theatre productions began in 1981 and continue today with the annual Summer Season of musicals produced by the Moonlight Stage Productions.

The Amphitheatre is home to more than 50 events annually including the City's Fourth of July celebration, Youth Theatre productions, church services, and concerts. Over one million people have attended Moonlight shows and events since the early 1980's.
