BUILDING VALUATION TABLE

This information bulletin provides construction valuation amounts used to determine the building valuation for new construction, miscellaneous building projects as well as alterations and additions to existing structures. Building valuation is used for reporting purposes and is also used in the determination of State seismic and strong motion instrumentation fees, etc.

The following Building Valuation Data has been provided by the International Code Council (ICC) in the February 2018 edition of the Building Safety Journal to determine the building valuation and provides average costs on a per square foot basis.
