

South Santa Fe Streetscape Project CIP
8289 & 8291
Construction Update
3/7/19

Two-Week Look Ahead Schedule
Subject to change.

For the purposes of orientation, it is assumed that South Santa Fe Ave. runs north/south.

South Santa Fe Avenue

The contractor DMI is constructing a new 8" water line on to serve properties on the east side from 702 SSF to 802 SSF. • To complete the new 8" water line Vista Irrigation District (VID) is scheduling to shut down the water system in the area on Wednesday 3/13/19 between the hours of 9:00 PM to 5:00 AM. VID will be sending out a separate notification to all customers that will be affected by this shutdown.

Once the new 8" water line is complete, the new 18" water line from Oceanview Drive to 802 SSF will be placed into service along with any new water facilities associated with the new 18" and 8" water lines.

Terrace Drive

DMI will be constructing a portion of the new 8" sewer, 8" water, and storm drain from South Santa Fe Ave. far enough to complete the work within South Santa Fe Avenue. The remaining portion to the driveway at Sunset Cliffs (180 Terrace Drive) will be scheduled later. This street segment will be repaved prior to project closeout.

Pala Vista Drive

Pala Vista Drive has been closed to east bound traffic between South Santa Fe Avenue and Mercantile Street for the construction of a new 12" sewer main.

Guajome

Guajome Street will remain open. The City has installed parking directional signs to direct traffic to Mercantile Street for businesses that have direct access onto Mercantile Street.

As a reminder, the City is giving special consideration for business signage during construction. Businesses are encouraged to provide additional signage for their businesses. For more information on business signage, please visit "Road Construction Tool Kit" on the City's website:
<http://www.cityofvista.com/home/showdocument?id=15227>.

Thank you for your patience. Please contact me if you have any questions or concerns.
